# Hello Humans - one solution is here!

Starting with only 71 founders, each pays 71€, we are now registering the One-Signal being a European-Cooperative structured as a "Liquid-Union" to serve the people in Europe.

- Liquid union is made for representing authentically the people, being active as participants, from a huge and diverse population, such that, per each project providing specific set of needs of the participants, multiple channels of providers are financed proportionally to periodical vote of the participants.
- The founders of One-Signal should be competent, from different groups, able to co-work, having ambition for positive change together with the necessary patience for completing such huge task.

This way, the power over the money flow is back under the control of the participants - not of their representative and bureaucrats, while the participants can move between the channels without losing their union privileges and while the groups integration in the union is made without one group deciding for the others. Hence every group wins a proportional part but No "Winner Takes All". We are starting by triple form of concert/exhibition:

- Artistic - by musicians, poets, performances, dj, vj on stage and in streets;
- Telling - by people who share their personal longing for, or experience in, migrating and/or being equal in group ; and
- Realization - by finding the people to group with and sing up to liquid union.

*Definition:* **Liquid** union is a union, of which objective is serving specific population in authentic manner, where people from that population can become its **participants**, such that the union provides its participants its resources, services and/or products, only via more than one **channel** per project, where

- each project, specified by different objective supplying specific need of specific population, distributes its budget to its channels proportionally to periodical vote of the participants choosing one of the existing or new channels,
- member of the union must also be its participant and any of its participants can voluntarily become its member, where
  - members' vote can only be after all participants are notified fairly in advance (default minimum 2 months) and only for dissolving the liquid union/projects or for starting impeachment process against its elected committees,
  - only participants can be elected to such committee and only for maximum time (default 2 cadence of 1 year) and
  - at least these 3 committees are functioning in the union/project:
    - Board - implementing the decisions made by the participants votes,
    - Reporting - any participant can notify, as the objective of the reporting committee is to report, to all participants, about any possible improvement in the Board implementations,
    - Experts - any participant can suggest subjects to vote upon but Experts committee can help to finalize suggestions for the participants vote.
- Projects in liquid union can be made in 4 fields, namely:
  - consumption,
  - transportation,
  - housing and
  - media/education.
- Liquid union can be a project in bigger liquid union, this way sub populations can be financed and liquid union networks can be growing upward.
